One South Station, Floor 2
Boston, MA 02110

**Re: Boston Edison Company
D.T.E. 01-78
MWRA Rate WR
Tariff M.D.T.E. No. 974**

Dear Secretary Cottrell:

Enclosed herewith for filing is tariff M.D.T.E. No. 974, for which Boston Edison Company ("Boston Edison" or the "Company") requests an effective date of January 1, 2002. The tariff contains a new Rate WR, which replaces the existing tariff for Rate WR, M.D.T.E. No. 944. The enclosed M.D.T.E. No. 974 supersedes and replaces the proposed M.D.T.E. No. 960 filed on December 3, 2001 in this docket, which is hereby withdrawn. We have enclosed both two originals of the subject tariff, as well as a "red-lined" version showing the differences from the current tariff. Also enclosed is a check in the amount of \$15.00 as payment of the applicable filing fee.

The proposed rate implements two changes from the currently effective rate. First, the new rate unbundles the "Delivery Services" component of the rate, reflecting the fact that the sole customer on this rate, the Massachusetts Water Resources Authority (the "Authority"), has, effective November 1, 2001, elected to leave Standard Offer Service and has commenced receipt of generation supply from a competitive supplier. Since the customer is no longer eligible for Standard Offer Service, the provisions of the rate which pertain to receipt of Standard Offer Service have been deleted. Second, the new rate reflects changes in the level of charges for Transition, Transmission, Energy Efficiency and Renewables for 2002 that are consistent with the changes for 2002 for these rate components for all other rate classes. The basis for these

generally applicable rate changes for 2002 are discussed in the Company's December 3, 2001 filing.

Concerning the unbundling of the "Delivery Services" component, it should be noted that the existing Rate WR, M.D.T.E. No. 944, and all prior versions of that rate since the implementation of electric industry restructuring, were calculated and established on a bundled basis tied to the fact that the customer was a recipient of Standard Offer Service. It was acknowledged that use of a bundled rate design for "Delivery Services" was contrary to the statutory directive of G.L. c. 164, § 1A(a) and Department policies regarding the unbundling of rates, and was driven by the statutory directive of G.L. c. 164, § 1B to provide overall discounted rates to customers that receive Standard Offer Service. *See Boston Edison Company, D.P.U./D.T.E. 96-23, pp. 33-38 (1998).* Accordingly, it has at all times been clearly recognized that the rate design for Rate WR would be subject to change at such time as the MWRA elected to leave Standard Offer Service.¹

Consistent with this understanding, the unbundled rate components of the proposed M.D.T.E. No. 974 are set at the historical distribution cost of service level for Distribution Charge, but reflect the full, undiscounted payment of all other rate components, including the Transition Charge, in the same manner as established for the Company's other rate classes. Attachment A provides an analysis of the proposed change in rates for the MWRA for 2002, and for reference, Attachment B provides an analysis comparing the rates in the proposed M.D.T.E. No. 974 with the rates in the withdrawn M.D.T.E. No. 960 (which reflects the 2002 rates that the Company would have proposed had MWRA not left Standard Offer Service). From the analysis in Attachment B, it can be seen that, on an annualized basis and applying historical billing quantities, the unbundled rates in M.D.T.E. No. 974 result in approximately \$1.2 million of additional "Delivery Services" revenues, all of which would be effectively accounted for as Transition Charge revenues, and fully reconciled as part of, the Company's existing Transition Charge reconciliation process.

¹ See Paragraph 3 of Stipulation between Boston Edison Company and Massachusetts Water Resources Authority dated April 14, 1998 in Docket D.T.E. 97-113. ("For future modification of tariffs pursuant to the Settlement Agreement as approved by the Department in DPU/DTE 96-23 or pursuant to the Electric Restructuring Act (Chapter 164 of the Acts of 1997) Boston Edison and MWRA agree that the percentage rate reductions for the WR rate class should be maintained insofar as practicable at the average of the percentage rate reductions for other rate classes. Such approach should be maintained, subject always to Department approval, at least until such time as Boston Edison and MWRA have entered into an overall settlement of WR rate issues, or MWRA has elected to leave Standard Offer Service, or there has been a Department-approved unbundling of the WR Delivery Services rate component; provided that Boston Edison shall provide MWRA with notice of any filing seeking to unbundle the WR Delivery Services rate component and shall not oppose MWRA intervention therein." (emphasis added)) See also Page 7, lines 11-13 of Prefiled Direct Testimony of Henry C. LaMontagne, Exhibit BEC-HCL in Docket D.T.E. 00-82. ("Should the MWRA at any point wish to leave Standard Offer Service and the statutorily protected rate reduction, the Company would expect to revisit the issue of WR rate design including the implementation of unbundled rates.")

In filing the enclosed M.D.T.E. No. 974 with an effective date of January 1, 2002, the Company notes that it has engaged in discussions with the MWRA in an attempt to agree upon the appropriate parameters for and level of Rate WR following the MWRA's decision to leave Standard Offer Service.² The Company remains willing to continue such discussions with the MWRA, and other interested parties such as the Attorney General, in an attempt to reach a settlement. In the interim, and as a condition of the receipt of an effective date of January 1, 2002 for M.D.T.E. No. 974, the Company is willing to stipulate that any portion of such rates that is an increase over the level of rates for "Delivery Services" that would have been collected under the proposed M.D.T.E. No. 960 would be collected by the Company subject to refund with interest, should the Department determine after investigation that the revenue levels produced by rates in M.D.T.E. No. 974 be reduced, or should the Company and the customer, with Department approval, successfully settle or resolve this matter in some alternative fashion.³

If there are any questions regarding this filing, please contact the undersigned.

Respectfully submitted,

William S. Stowe
Assistant General Counsel

² The WR Rate was established in accordance with the terms of a 1990 contract between the Company and the Authority, which was approved by the Department. Harbor Electric Energy Company/Boston Edison Company, D.P.U. 90-288 (1991).

³ The Department has historically approved rates subject to refund where the utility proposing the rate change has voluntarily agreed to such refunds. *See, e.g.,* Pine Hills Water Company, D.T.E. 01-42 (2001); Pond Properties, Inc., D.P.U. 90-91 (1990); Boston Gas Company, D.P.U. 18264-A (1975); Boston Gas Company v. Department of Public Utilities, 368 Mass. 780, 785 (1975).

BOSTON EDISON COMPANY

MASSACHUSETTS WATER RESOURCES AUTHORITY RATE WR

AVAILABILITY

Service under this rate is available for electricity supplied and delivered in bulk for the purpose of construction and operation of the Deer Island Treatment Facility from the Boston Edison Company's K Street Transmission Station.

CHARACTER OF SERVICE

High tension alternating current, 60 cycles, 3 phase, at 115,000 volts nominal.

MONTHLY CHARGE

The Monthly Charge will be the sum of the Retail Delivery Service and the Supplier Service Charges.

DELIVERY SERVICES

Distribution Charge : \$225.00

Transmission Charge

Demand Charge Per kW (in excess of 5,000 kW)	<u>October - May</u> \$1.69	<u>June - September</u> \$1.69
---	--------------------------------	-----------------------------------

Transition Charge

Energy Charge Per Delivered kWh	<u>October - May</u>	<u>June - September</u>
Peak Hours Use	1.628 ¢	1.628 ¢
Off-Peak Hours Use	1.628 ¢	1.628 ¢

Energy Efficiency Charges

Energy Charge Per Delivered kWh	0.250 ¢
---------------------------------	---------

Renewables Charges

Energy Charge Per Delivered kWh	0.075 ¢
---------------------------------	---------

BOSTON EDISON COMPANY

MASSACHUSETTS WATER RESOURCES AUTHORITY RATE WR

SUPPLIER SERVICES

Default Service (Optional)

As in effect per Tariff

DEFAULT SERVICE

If the MWRA has received service at their Deer Island Treatment Facility from a supplier other than the Company, and does not have a current supplier, it is no longer eligible to receive Standard Offer Service. In this case, the MWRA will receive Default Service from the Company in accordance with the terms and price for Default Service as approved by the Department of Telecommunications and Energy.

MINIMUM CHARGE

The minimum charge per month is the Customer Charge or the Distribution Charge, as applicable.

DETERMINATION OF DEMAND

The billing demand will be the maximum fifteen-minute demand (either kilowatts or 90 percent of the kilovolt-amperes) as determined by meter during the monthly billing period,

except any demand recorded during off-peak hours will be reduced by 70 percent. Demands established prior to the application of this rate shall be considered as having been established under this rate.

BILLING

In determining if a demand charge reduction is applicable, the following defines the peak and off-peak periods:

- (1) During the months of June through September, the peak period shall be the hours between 9 A.M. and 6 P.M. weekdays. During the months of October through May, the peak period shall be the hours between 8 A.M. and 9 P.M. weekdays.

BOSTON EDISON COMPANY

MASSACHUSETTS WATER RESOURCES AUTHORITY RATE WR

- (2) All other hours shall be off-peak including twelve Massachusetts holidays as follows:

New Year's Day
Martin L. King Day
President's Day
Patriot's Day
Memorial Day
Independence Day

Labor Day
Columbus Day
Veteran's Day
Thanksgiving Day
Day after Thanksgiving
Christmas Day

ADJUSTMENTS

Charges under this rate shall be adjusted from time to time in accordance with: the Default Service Adjustment Provision; the Transmission Service Cost Adjustment Provision, the Transition Cost Adjustment Provision, and the Restructuring True-up Charge.

Filed: December 14, 2001

Effective: January 1, 2002
